Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election without traverse of Group II, claims 4-7 in Paper No. 10062003 is acknowledged.

Claims 1-3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10062003.

It is noted that claim 5 is ungrammatical or at least unclear at "is designed in cylindrical shape ...

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Andersson '695 or Kobayashi '169 or Adachi '915 or Wenckus '384.

Andersson '695 or Kobayashi '169 or Adachi '915 or Wenckus '384 each suggest the instantly claimed induction heater having a cooling means supplying a cooling medium to a crucible. See cols. 1,3 of Andersson; col. 1 of Kobayashi; cols. 1,5,7 of Adachi; the abstract and col. 5 of Wenckus. The taught induction systems would appear to be suitable for use in a pyrochemical reprocessing method using a molten salt because the taught induction systems are the same as that instantly claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
